# ESG-CONSULTING

We set the highest ESG standards for our projects. To meet these standards, each project is reviewed based on our sustainability guidelines.

These guidelines include over 100 specific measures relating to environmental, economic and social issues.

We show our customers ways to manage their own properties sustainably, helping them to reduce operating costs and make the most of their buildings' potential.

We would be happy to advise you on your own projects!

- ✓ Individual construction solutions with high flexibility
- ✓ High-quality products designed for durability
- ✓ CO2-reduced construction (EG-40/EG-55)
- ✓ Independent reviews by the DGNB
- ✓ EU taxonomy assessment
- ✓ Standard climate risk analyses
- ✓ Holistic ecological concepts
- ✓ Smart building consulting and technologies
- ✓ Energy monitoring
