Utilise the solar potential of your logistics property
and become less dependent on the electricity
market!

Sustainable and
economical

Increased value for
your property

Durable and
low-maintenance

PEPER & SÖHNE

ENERGY SOURCE INDUSTRIAL ROOF

PSP Energieservice GmbH combines our expertise as a project developer with our ambition to contribute to climate protection when it comes to the development of commercial properties.

We help our customers utilise existing industrial roofs or roofs under development for rooftop photovoltaic systems. Local power generation is cost efficient and increases your independency from the services of regional electricity suppliers!

As a full-service provider - both for the roofs of our own projects as well as for third-party roofs - we offer you the following services:

- ✓ Consultancy
- ✓ Profitability analysis
- ✓ Site analysis
- ✓ Assembly & installation
- ✓ Grid connection & registration

Interested? We look forward to your enquiry!
