

PHOTOVOLTAICS FOR YOUR PROPERTY

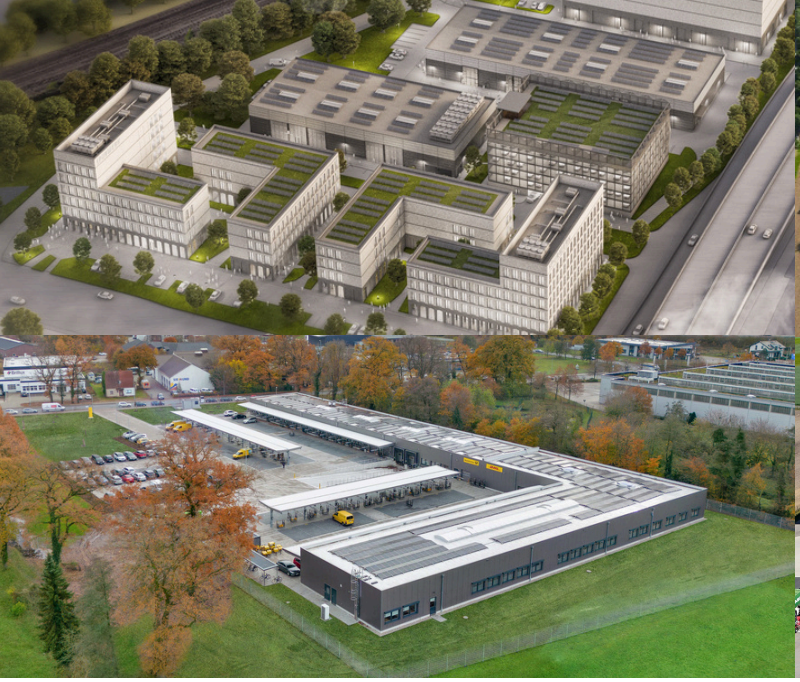

Utilise the solar potential of your logistics property and become less dependent on the electricity market!

Economical and predictable

Increased value for your property

Durable and low-maintenance

PEPER & SÖHNE

ENERGY SOURCE INDUSTRIAL ROOF

With PSP Energieservice GmbH, we combine our expertise as a project developer with the expansion of renewable energy on commercial properties.

We support our clients in using existing or planned industrial roofs for rooftop photovoltaic systems. With electricity from your own roof, you become less dependent on price fluctuations in the energy market.

As a full-service provider - both for the roofs of our own projects as well as for third-party roofs - we offer you the following services:

- ☑ Consultancy
- ☑ Profitability analysis
- ☑ Site analysis
- ☑ Assembly & installation
- ☑ Grid connection & registration

Interested? We look forward to your enquiry!
