

IT-CONSULTING

Process optimisation, security, value creation and ESG reporting for your commercial property!

Practical and individual concepts

Increased value for your property and business

Efficient and user-friendly processes

PEPER & SÖHNE

IT-CONSULTING

In our increasingly digitalised world, IT security and efficient IT structures are issues that affect us all – especially in the commercial property sector.
Many underestimate the costs and risks associated with inadequate structures.

Thanks to our experience as project developers and as asset and property managers, we understand the requirements for state-of-the-art IT and for the ESG performance of commercial real estate.

We would be happy to develop tailor-made and innovative solutions for you too!

- Digital readiness for ESG and EU taxonomy
- Smart building consulting and technologies
- IT infrastructure concepts
- Consulting on digital working environments
- IT process consulting
- Access control and surveillance systems
- Cybersecurity audits and risk analyses
