

LAND DEVELOPMENT AND REVITALISATION

Value-enhancing and future-proof property development!

Analysis of the potential of undeveloped or no longer marketable land

Increased value through the development of suitable utilisation concepts

Process management and coordination from the initial idea to the building permit

PEPER & SÖHNE

LAND DEVELOPMENT AND REVITALISATION

Land is scarce. In accordance with Section 1a of the German Building Code (BauGB), the focus is on the economical use of land – with priority given to inner-city development, redensification and reuse.

This is exactly where we come in: we analyse the potential of undeveloped or no longer marketable land, develop suitable utilisation concepts and create new building rights. Our goal: lasting value growth and viable long-term use.

- Potential analysis & due diligence
- Planning and building law creation
- Brownfield revitalisation & demolition
- Development & infrastructure concepts
- Project management including coordination with authorities
- ESG/EU taxonomy focus
