> 100 measures

Practical  
implementation

Handbook on sustainable  
management

PEPER & SÖHNE

# ESG-CONSULTING

Our goal is for all our projects to meet at least the DGNB Gold Standard. In addition, we evaluate each project based on our own sustainability guidelines, including over 100 specific measures relating to environmental, economic and social issues.

We show our clients ways to efficiently manage their own properties, thereby helping them to reduce operating costs and make the most of their buildings' potential.

We would be happy to advise you on your own projects!

- ✓ Individual construction solutions with high flexibility
- ✓ High-quality products designed for durability
- ✓ CO2-reduced construction (EG-40/EG-55)
- ✓ Independent reviews by the DGNB
- ✓ EU taxonomy assessment
- ✓ Standard climate risk analyses
- ✓ Biodiversity and Open Space Plans
- ✓ Smart building consulting and technologies
- ✓ Energy monitoring
